

# TrustOps Autopilot - Security Overview

Last Updated: February 2026

## 1. Encryption

All data encrypted in transit via TLS 1.3 and at rest via AES-256.

## 2. Access Control

Role-based access control with least-privilege defaults. SSO/SCIM available.

## 3. Infrastructure

Hosted on SOC 2 certified cloud infrastructure with regular pen testing.

## 4. Audit Logging

Immutable audit logs for all actions with timestamps and user details.

## 5. Data Retention

Configurable retention policies. Data deletion on request with verification.

## 6. Incident Response

24-hour notification commitment. Documented response procedures.

## 7. AI Security

No training on customer data. Human-in-the-loop for all AI suggestions.
